Heat Treating/Stress Relieving & Insulation Pads

Pyro Shield provides re-usable insulation and welding protection for different types of Thermal Processing. There are (3) different types of heating operations: Electrical Resistance, Induction & Combustion. The PS-2000 insulation blanket is our most durable blankets and provides multiple re-uses up to 2000F. SNM 25 1" thick Silica Needled Mat insulation is the internal insulation for applications over 1200F. All products above have a steady state temperature rating of 1800 F + and will out-perform the Ceramic Fiber products up to 50 times and comes without the disposal and health problems associated with Ceramic Fiber.
