Metal & Glass Industry

Pyro Shield provides a wide variety of parts and services to the metal and glass industry including annealing furnace parts, such as coil cover seals, furnace seals, and insulation modules with or without anchoring system. We also supply the blast furnaces with trough covering, hose covering, and re-usable blankets for temporary covering.

Our products are also currently being used in several Coke Plants for seals on coke batteries, to battery doors and port hole sealing and gaskets.

Pyro Shield products are commonly used within the casting area, as we fabricate Tundish covers, seals, Silica boards and

ladle covers.

We also provide several products used in Aluminum Plants. The rolling mills, use our “no shot” insulation in their furnaces in addition to seals, and gaskets.

Our Products:

You can purchase any of our pre-made products, or we can custom make anything to meet your needs.

Solutions For:
