## TADPOLES AND GASKETS AT PYRO SHIELD

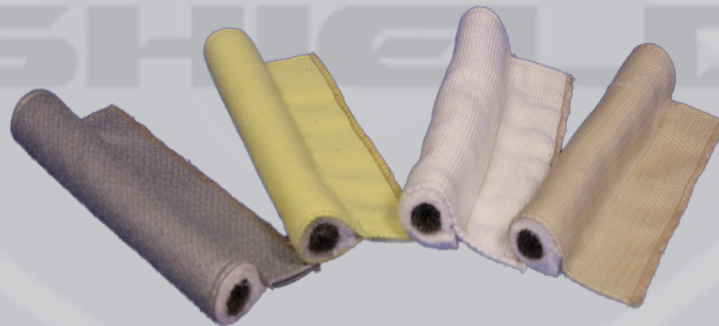

Pyro Shield makes a variety of door and tadpole gaskets and seals to fit your needs. We have the ability to customize your tadpoles to meet your application's needs, temperatures and requirements.

Door seals, gaskets and tadpoles are made to last longer using our high temperature fabrics and mats, stainless steel wire meshes, and aluminized fabrics.

**Pictured above:** Tadpoles made with a silica needled mat bulb. **From left to right:** Tadpoles made with our Herringbone, Kevlar, GR2-SRC, and 1400 fabrics. Our 1400 is designed with and without an aluminum tail.

**Pictured below:** Tadpoles made with a wire mesh bulb. **From left to right:** Tadpoles made with our GR2-SRC, Kevlar, 1400, and Herringbone fabrics.

Our tadpole seals are very resilient and made with flame-resistant fabrics and mats. They're well suited for applications requiring sealing under pressure where bolting is limited such as oven doors, combustion inlets, aircraft (mounting) rings, and turbine flanges. The sealing takes place when pressure or closure is against the bulb of the tadpole or gasket, conforming and sealing even and uneven surfaces. Fiberglass mats and fabrics are also available for applications up to 1,000°F.
