# WELDING AT PYRO SHIELD

## Insulated Welding Pads

Our welding pads are perfect tools for welders as they can be used for many applications including post weld heat treating (PWHT) and slow cooling. The heat resistance in the welding fabrics guarantees the pads won't be destroyed after exposure to extreme heat. These pads can be used to move and place hot parts and serve as a holder for parts too hot to touch.

## Welding Blankets and Curtains

We offer a variety of welding blankets and curtains for numerous applications. Our fiberglass welding blankets are perfect for light welding, grinding, and cutting. For heavier welding, slag, and splatter, consider our high temperature blankets made with quality silica fabrics. All blankets and curtains can be fabricated to most any size and grommets can be placed where needed.

## Welding Chair

Our welding chair is comfortable, durable, and allows you to get into those tight spaces that are otherwise hard to reach. The chair is covered in resistant material and can endure temperatures up to 2,300°F, making it ideal for most situations. Our chair is also easy to customize as it comes in a variety of styles and is made with and without Stainless Steel wheels.
